PAPER NUMBER

3753

DATE MAILED: 06/22/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/016,294

Applicant(s)

TROIAN ET AL.

Examiner

A. Michael Chambers

Art Unit

3753

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-83, 98 and 99 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☐ Claim(s) 1-83, 98 and 99 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date ____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: ____.

Art Unit: 3753

DETAILED ACTION

1. This action is in response to an amendment filed March 24, 2004. Claims 1-9, 12, 28-30, 36-44, 47, 63-65, 74, 79, 83, 98 and 99 have been amended. Claims 84-97, 100 and 101 have been canceled. An informational disclosure document (IDS) filed June 24, 2002, has previously been considered. Claims 1-83, 98 and 99 are pending.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 3753

4. Considering objective evidence present in the application indicating obviousness or unobviousness.

5. Claims 1-83 are rejected under 35 U.S.C. 103(a) as being unpatentable over Figures 11 and 11a of Neukermans. **See column 13, lines 2+ in which Neukermans states that a plurality of heaters (individually activated or as desired) 196 may disposed above below or in both substrates of the "patterned" microfluidic device comprised of a plurality of substrates shown in Figures 11 and 11a and selectively actuated to control the movement of the fluid through a respective flow path.** A number of flow path configurations including reservoirs and pathways of varying geometric configurations are shown. Regulation of liquids in DNA or peptide sequencing is disclosed. It would have been obvious to one having ordinary skill in the art at the time the invention was made to operate the microfluidic device in particular the respective heaters of Neukermans in order to rout the liquid "...on the patterned surface....". Applicants argue that the "capillary" is an enclosed layer and has amended the claim to include the limitation of "surface pathways". An enclosed "capillary" includes "surface pathways" as recited in the claims. Applicants argue that the instant application is drawn to "open architecture" configuration and "ambient atmosphere" in contact with the "liquid" on the open surface. No such "open architecture" or "ambient atmosphere" relationships are recited in the claims. The claims include recitation that the liquid is received on a patterned surface which is clearly the case with the microfluidic device of the applied patent to Neukermans. Applicants are asked to reconsider the bolded teachings (above) of activation or deactivation of a plurality of heaters to "... prevent or promote the migration of said liquid along one or more surface pathways...". Heating of the liquid moves the fluid along the surfaces of the device of the applied patent to Neukermans.

6. Claims 98 and 99 are rejected under 35 U.S.C. 103(a) as being unpatentable over pages 353 - 355 of the "Thermocapillary Pumping of Discrete Drops in Microfabricated Analysis Devices" by Sammarco et al. Sammarco et al teach fluid control by heating of a plurality of

Art Unit: 3753

fluids and it would have been obvious to one of ordinary skill in the art to operate the microfluidic device by the recited steps of claims 98 and 99. Similar remarks as above apply as above.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Newly cited patents to Deshmukh et al and Yang et al are cited of particular interest as showing microfluidic devices whose fluid is moved along device surfaces in response to "...activating one or more heaters..." shown adjacent bubble 42, and heater 35, respectively.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

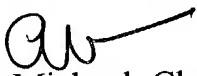

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
